Organize Posts in Categories

Features · https://www.evergreencontentposter.com/support/features/organize-posts-in-categories/

Get a solid mix of content by adding content in buckets called categories.

By assigning each post to a specific category, it’s easy for you to set a posting schedule based on categories.

But you can also create a category with posts just around let's say a holiday theme, the moment the holiday is over you can pause the category so these posts won't be shared to your social media channels again till the moment you activate them again.
